

**Helping you  
create your client's  
perfect door**

urban | front®

# The right front door can transform any project and working with natural materials adds an additional element of prestige - and value

Urban Front have been handcrafting bespoke, natural hardwood & metallic coated doors for over 2 decades.

Every door is exclusively designed & handcrafted in-house to our advanced specifications.

## Good to know

Sustainability is at the heart of everything we do. Amongst many other things, we only source the finest timbers from FSC-certified suppliers, we re-use or re-purpose wood waste and we also plant two trees for every door we make.

# 1

## Urban Front offers you...

### **...bespoke, exclusive products**

We understand the demands of a house build or renovation and bring attention to detail to match the most challenging requirements.

Whether it's a door that's 3m tall, additional glass or wood side panels or cladding, our fully in-house service means we've got the flexibility and expertise to produce the exact door your client needs.

### **...FREE design service**

We welcome the opportunity to lend our decades of experience and broad design skills to bring your client's vision to life.

From door to full frontages, we can help you to visualise & refine ideas and keep your project moving.

## ...full technical assistance

We have detailed specifications, .dwgs, BIM and L20 information for all our ranges.

Visit **[urbanfront.co.uk](http://urbanfront.co.uk)** for more details or call **01494 778 787.**

You'll also receive final bespoke CADs for sign-off at the point of order.

## ...ongoing support

From our initial contact through delivery and beyond, we'll work closely with you to ensure you've got everything you need to complete your project successfully.

We're only ever a phone call or e-mail away (and you're always welcome to visit our Buckinghamshire office & showroom if it suits).

## Choosing the door material

Urban Front specialise in handcrafting natural hardwood doors & also offer additional ranges of luxury materials and finishes.

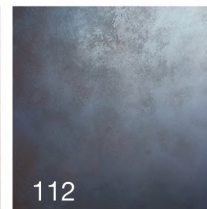

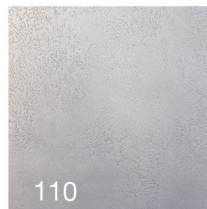

For minimum maintenance, choose a RAL-painted finish.

For maximum beauty & exclusivity, choose a hardwood or metallic door with at least 50% cover.

### Real natural hardwoods & hardwood finishes

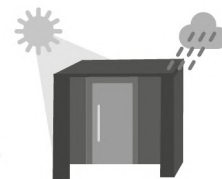

### 4 real bronze finishes (exterior side only)

Hardwood & metal are natural materials that will weather over time when exposed to the elements.

We recommend our doors are protected with full canopy or porch protection to minimise maintenance.

# 4

## How will the door open?

Classic hinged. Or ultra-modern pivot. Both opening types are very popular and both options are priced the same at Urban Front.

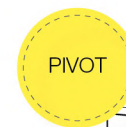

### **i** Hinged opening:

3D concealed hinges

Fully weather-sealed

Suitable for all locations (fully exposed to fully protected)

### **i** Pivot opening:

Reduces the entrance width by around 150-200mm

Start from a minimum width of 1200mm (inc frame)

If air-testing is important, we recommend the hinged option

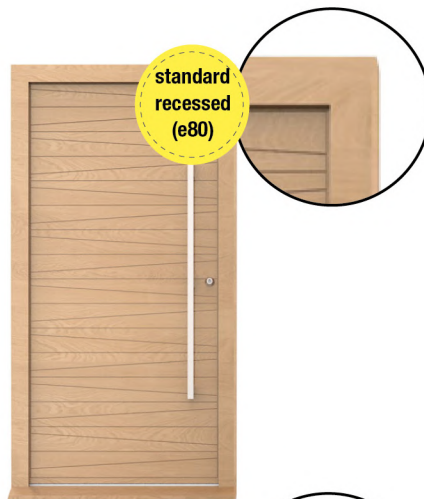

We recommend canopy/porch protection

# 5

## What will the door look like in the frame?

The door structure refers to the way the door is built AND how it looks in the frame.

The fully flush style is favoured in contemporary builds where a very modern aesthetic is desired.

standard  
recessed  
(e80)

### **i** Recessed door structure

Our standard structure has the door leaf recessed and set back slightly in the frame. The interior side is flush.

Fully weather-sealed

Suitable for all locations (fully exposed to fully protected)

fully flush  
(e98)

### **i** Fully flush door structure

The fully flush door leaf is flat in-line with the front of the frame on both the exterior and interior sides.

If air-testing is important, we recommend choosing the recessed structure.

We recommend canopy/porch protection for fully flush doors.

# 6

## Final finishing and maintenance matters

Urban Front hardwood & metallic doors come with a couple of different protective/sealing finish options.

### Door finish options

	Sealing/protective	Unfinished
Hardwood	Oil Lacquer	N/A
Metallic	Beeswax Lacquer	Oxidises Weathers naturally (patina/rust)

#### Benefits of lacquer finishes

- Provides a robust protective surface
- Maintenance required less frequently

#### Good to know

- Where oil sinks into the wood, clear lacquer sits on top so you will see more of a mid-sheen finish
- Maintenance will take a little longer than an oil update

#### Benefits of oil or beeswax finishes

- Maintains the natural grain or texture of wood or metal
- Maintenance is quick and easy to do

#### Good to know

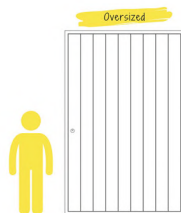

- An oil finish may naturally deepen the colour a little which is more noticeable on lighter hardwoods.
- Maintenance may be needed more frequently
